

Expert tips

New high-pressure hoses and quick connect system = Easy Connect EC for 3,000 bar (43,500 PSI)

Terms:

- Easy, fast, safe
- Pressure range up to 3,000 bar (40,600 PSI), DN5 and DN8
- Less single parts
- Turnable if system is pressureless. Replaces rotary joints
- No tools required, means massive time savings = EC (Easy Connect)
- Stringent safety: If assembled incorrectly it will not work
- Burst pressure of the couplings is considerably higher than that of the hose
- System achieves all valid safety standards

Advantages:

- Less wear of components, no threaded unions and no "sticking" possible
- Faster assembly time, saving valuable job time
- Easiest handling and ergonomic design
- Hose twisting eliminated – longer hose life
- Operator protection assured
- Few parts, small stock and nearly no wear and tear parts
